Dimensions and weight

Description

Fiber laser HESSE HD-FO made by DURMA

The HD-FO is our compact entry-level model. Control, laser source and cooling are integrated into the system to keep the overall dimensions as small as possible.

The shuttle table is positioned at the front, making this system ideal for customers who do not have sufficient space for classic longitudinal positioning.

Optionally, the HD-FO can also be equipped with a manually extendable table.

The cutting head has automatic focus adjustment.

This makes the system a particularly economical, fast and very easy to operate production machine.

The system consists of the following components:

Manual loading and unloading table

Encapsulated cutting room with protective glazing

CNC graphic control with touchscreen

Laser source Brilase Premium DRM-8 F150

Cutting head with automatic focus adjustment

Integrated cooling unit for cutting head and laser source

CAD/CAM software for programming including autonesting

Positioning laser

Sheet check system (automatic detection of sheet position and dimensions)

Automatic nozzle cleaning

Slug box

Working area lighting

Multi-chamber suction system

Remote maintenance access

Equipped according to CE guidelines

Option:

suction unit with filter
manually extendable table

Further options as Durma cloud on request.
